**PROFESSOR WILLARD
(CALLBACK)**

But first we want a little more information about our town—kind of a scientific account you might say. So I've asked Professor Willard of our State University to sketch in a few details of our past history here. Professor Willard? (*The STAGE MANAGER peers off R.*)

(*WILLARD, a little dried-up man, flutters in nervously from down R., Xes to R. C. on apron.*)
(*STAGE MANAGER takes hat off.*)

May I introduce Professor Willard of our State University. Just a few brief notes, thank you, Professor—unfortunately our time is limited. (*Xes to lean against proscenium, puts hat on.*)

START

PROFESSOR WILLARD. Grover's Corners—mmm—let me see—Grover's Corners lies on the old pleiocene granite of the Appalachian range. I may say it's some of the oldest land in the world—we're very proud of that here. Of course there are some more recent outcroppings,—sandstone showing through a shelf of Devonian basalt, and some vestiges of Mesozoic shale, but these are comparatively new—perhaps two or three hundred million years. Some highly interesting fossils have been found—I may say, unique fossils—two miles north of the Peckham Farm—in Silas Peckham's cow-pasture. These

may be seen in the museum at the University at any time—that is, at any reasonable time. **END**
